

Bursa Malaysia: FTSE4Good ESG Scores on Malaysian PLCs Now Available to All

Considering ESG (environmental, social and governance) factors has become an important part of mainstream investment decision making. Across the globe, asset owners and managers of all sizes and strategies have chosen to incorporate ESG criteria into their investment decision making processes. As the Global Sustainable Investment Alliance reports that approximately US\$30.7 trillion dollars of investment is now managed according to ESG investment strategies, it is clear that ESG factors are also driving asset allocation decisions.

Investors often cite risk management against negative externalities as a key driver in choosing to implement a responsible investment approach. In addition to making a positive contribution to the societies in which they operate, companies with good ESG performance are often considered to have lower levels of risk than those which have not taken steps to mitigate material ESG risks. In emerging markets in particular, strong performance on ESG criteria is often seen as an indicator of quality factors and good management.

FTSE Russell's approach to ESG scores

FTSE Russell's ESG Data Model methodology analyses companies' exposure across a full spectrum of material ESG risks, classified into 14 ESG themes and underpinned by more than three hundred detailed quantitative and qualitative indicators. The starting point for this analysis is an understanding of the specific risks faced by individual companies to provide a basis for analysis of how companies are managing these risks. It adopts a 'bottom up' approach, by identifying the level of ESG risk faced by companies and assessing these against detailed indicators to see whether companies have disclosed steps taken in mitigation. An Exposure score is awarded on a range of 0-3 which represents the level of risk the company faces for each of the 14 ESG themes. This is combined with an assessment of disclosed actions the company has taken to mitigate the risk on a scale of 0-5. The Exposure score and the Performance score are computed to form an Exposure weighted ESG rating. It is important that companies that are more exposed to particular risks from

specific ESG themes are doing more to address them. Therefore, higher Exposure companies are assessed using higher thresholds than lower Exposure companies.

FTSE Russell provides ESG ratings for approximately 260 companies listed on the Bursa Malaysia Main Markets. The ESG ratings measure of the overall quality of a company's management of ESG issues. Companies are assessed according to a transparent and objective methodology which considers both the level of material ESG risk they face relative to their business operations; and publicly disclosed actions taken to manage the relevant risks. Ratings are calculated using an Exposure-weighted average, meaning that the most material ESG issues are given the most weight when determining a company's ESG rating.

Companies in the Bursa Malaysia EMAS universe with an ESG score exceeding a defined threshold are eligible for inclusion in the FTSE4Good Bursa Malaysia Index which has been screened to identify Malaysian companies with recognised

ESG practices. (The threshold score for eligibility to FTSE4Good index series is 2.9 for companies in emerging markets and 3.3 for companies in developed markets, as at 24 December 2019. The threshold level for eligibility changes from time to time).

The ratings for Malaysian companies are displayed in quintiles, to enable investors to identify those companies which score highly on FTSE Russell's ESG ratings. As Bursa Malaysia's index partner, FTSE Russell is committed to help promoting sustainable investment opportunities in the region.

ESG scores for Malaysian Companies

Since the FTSE4Good Bursa Malaysia index was launched in 2014, Malaysian companies eligible for inclusion in the FTSE4Good Bursa Malaysia have increased year on year. This indicates that the ESG scores of Malaysian companies has shown consistent improvement over time. In the area of corporate governance, Malaysian companies demonstrate some of the highest levels of performance in relation to other companies operating in Emerging Markets and in term of overall ESG ratings, ranked 5th out of 16 Emerging Market countries in FTSE Russell analysis of companies ESG

ratings in the FTSE GEIS All World Index, as at December 2019.

In addition, the FTSE4Good Bursa Malaysia index is also open to small cap companies in the EMAS benchmark universe. Whilst small cap companies often perform less well on ESG metrics than large caps, approximately 17 of the constituents in the index are small caps, indicating a good knowledge of ESG principles among Malaysian corporates.

Bursa Malaysia to expand regional digital offerings via DIBots

7 August - Bursa Malaysia Bhd, through a new strategic collaboration with financial service provider Worldvest Base Inc (WVB), will offer a one-stop cross-functional data solution which includes investor relations, strategic and operational decision-making and its compliance requirements. Under the collaboration, the stock exchange operator will provide relevant Malaysia market data while WVB will provide international financial and company-specific fundamental data. Both data sets will be made available on a new platform called "DIBots".

SC Grants M-REITs Temporary Increase in Gearing Limit

12 August - The Securities Commission Malaysia (SC) will temporarily increase the gearing limit for Malaysian real estate investment trusts (M-REITs) from 50% to 60%, effective immediately, until 31 December 2022. The temporary increase in gearing limit will provide M-REITs greater cash flow flexibility and allow M-REIT managers to manage their REIT's debt and capital structures more efficiently.

RAM Sustainability Awarded Status of Approved Verifier by the Climate Bonds Standards Board

18 August - RAM Sustainability is now an Approved Verifier for the certification of Climate Bonds under the Climate Bonds Standard & Certification Scheme (the Scheme) after having been awarded the status by the Climate Bonds Standards Board on 12 August 2020. This certification process under the Scheme will allow issuers to demonstrate to the market that their green bonds, sukuk or loans meet global best practice standards for climate integrity, management of proceeds and transparency.

Moody's acquires minority stake in MARC

11 August - Moody's Corporation has acquired a minority stake in Malaysian Rating Corporation Berhad (MARC) noting that the investment strengthens its presence in Southeast Asia and across domestic bond markets globally, and advances its position as a leader in Islamic finance. MARC will continue to operate as an independent entity and will remain separate from Moody's Investors Service and its credit rating processes and activities.

First ASEAN Green SRI Sukuk

12 August - HSBC Amanah Malaysia Bhd is arranging the first ASEAN Green Sustainable and Responsible Investment (SRI) Sukuk for Leader Energy Sdn Bhd worth RM260 million that will fund two solar photovoltaic power projects in Kedah. The project is accorded a "Gold" sustainability bond rating, the highest grade of MARC's Impact Bond Assessment methodology, implying the sukuk's alignment with ICMA's Green Bond Principles, ASEAN Green Bond Standards, and the SC's SRI Sukuk Framework.

iFast Corp to Provide Stock Dealing Services in Malaysia

17 August - Singapore-based iFast Corp says its Malaysian unit has been given approval in principle to deal in securities by the SC. The wealth management and brokerage platform is expected to launch stock dealing services early next year, in line with the group's objective of providing a comprehensive wealth management platform in Malaysia, similar to the group's other core markets such as Singapore and Hong Kong.

Malaysia's First Digital Sukuk Open to Retail Investors

18 August - Malaysia launches the RM500 million 'Sukuk Prihatin', a digital sukuk which will allow the rakyat and businesses to support Malaysia's economic recovery. The Sukuk Prihatin, part of the government's RM35 billion Economic Recovery Plan (Penjana), may be subscribed to with a minimum investment of RM500, with no maximum limit, digitally through JomPAY dan DuitNow. Subscription to the Sukuk is open to all Malaysian citizens aged 18 and above.

SC Inks Fintech Cooperation Agreement with OJK

24 August - The SC signed a financial technology cooperation agreement with Indonesia's Otoritas Jasa Keuangan (OJK) to establish a collaborative framework to develop the Fintech ecosystem in both markets. The agreement between the SC and OJK aims to facilitate information sharing on emerging trends and regulatory developments in Fintech, provide joint innovation project opportunities and facilitate referrals of Fintech businesses seeking to operate in each other's jurisdiction.

New Public Interest Director at Bursa Malaysia

27 August- Bursa Malaysia Bhd has announced the appointment of Datuk Wan Kamaruzaman Wan Ahmad (pictured) as a Public Interest Director to its Board of Directors effective Sept 1, 2020. Datuk Wan previously served as the chief executive officer (CEO) of the Retirement Fund (Incorporated) (KWAP) from 2013 to 2018. He is a director of the Minority Shareholder Watch Group and was the first chairman of the Institutional Investors Council.

Islamic Fintech: Malaysia Seen as Most Welcoming Jurisdiction

1 September - The IFN Fintech Survey 2020 which polled 142 founders and CEOs of Islamic fintech start-ups revealed that Malaysia is seen as the most welcoming Islamic fintech jurisdiction, followed by the UK and the UAE, with Southeast Asia being viewed as the biggest market with Islamic fintech growth potential. Respondents also indicated that the top five fastest-growing Islamic fintech verticals in 2021 are expected to be P2P & Crowdfunding, Payment & Remittance, Personal Finance Management, Challenger Banking and Robo Advisory.

Rise in Millennial Retail Investors amidst Covid-19

27 August: CGS-CIMB Research reported a 125 % year-on-year (y-o-y) increase in new central depository system (CDS) account openings in the first seven months of 2020 (7M20). It said 78% of the new accounts were opened by investors aged 45 years and below, adding that millennials currently make up 36 % of total CDS account holders. Online trading by retail investors also rose to 80 % in July 2020 from 50%-60% in 2019.

Dana Penjana Launched

27 August - The Penjana Nasional Fund (PNF) was launched with an allocation totalling RM1.2 billion in a bid to drive the country's economic recovery via digitalisation of businesses. RM600 million of the allocation would come from the government, and the other RM600 million from domestic and international VC funds. PNF, or Dana Penjana, will be managed by Penjana Kapital - an entity set up by the Ministry of Finance Incorporated to ensure governance, transparency and close monitoring of the funds disbursed. Dana Penjana will allocate funding across four different stages of the venture capital life cycle.

1. Seed/Co-Creation stage - support ranges from RM500,000 to RM5.0 million;
2. Series A/B stage, for companies that have passed the ideation stage, with funding from RM5.0 million to RM20.0 million;
3. Growth Stage, which represents the expansion stage for a company, with investment ranging from RM20.0 million to RM50.0 million;
4. Venture Debt, which provides short/mid-term financing for early- mid- and late-stage companies and start-ups, with funding ranging from RM1.0 million to RM10.0 million

New Group CEO for MARA Corp

3 September - Former Tabung Haji deputy group chief executive officer (CEO) Datuk Badlisyah Abdul Ghani has been appointed group CEO of Mara Corp Sdn Bhd. Mara Corp is an impact investment and commercial unit of Majlis Amanah Rakyat (Mara). Besides Tabung Haji, Badlisyah had also previously served CIMB Group Holdings Bhd as CEO of CIMB Group Islamic Banking and CEO of CIMB Islamic Bank Bhd.

Sustainable Companies: An Interview with the CEO of Duopharma Biotech

In July 2020 Duopharma Biotech was included in the Bursa Malaysia FTSE4Good Index making it one of 73 Malaysian public listed companies on the Index's list of constituents. We sit down with Duopharma's CEO, Leonard Abdul Sattar to understand the company's corporate sustainability journey.

When did Duopharma Biotech first embark on its sustainability initiatives, and what did these early days look like?

Duopharma Biotech initially embarked on sustainability initiatives back in 2006 after being acquired by Chemical Company of Malaysia Berhad. In 2015 we decided to disclose our operations-related initiatives in our first sustainability report. In those early years, we were largely focused on Safety, Health and Environment (SHE), Corporate Social Responsibility (CSR) and sustainability awareness campaigns in a non-integrated manner. For instance, we organised social programmes for the community such as CCM PINTAR programme which enabled students throughout Malaysia to improve their proficiency in English. We also participated in Save Our Rainforest Race organized by Pertubuhan Pelindung Khazanah (PEKA), and Responsible Care Run organized by Chemical Industries Council of Malaysia ("CICM") to promote the conservation of the environment, in addition to initial tracking of our environmental footprint and safety performances. Our actions are aimed to ensure benefits for our stakeholders and environment. Over the years, our sustainability initiatives and reporting have been enhanced to reach higher maturity level with a more integrated approach.

What was the main impetus behind embarking on sustainability journey – was it driven by investor demand?

Our investors were definitely one of the key reasons behind it. However, we believe in embedding a strong sustainability culture in our operations via the recognition of our internal and external stakeholders. We realize that Duopharma Biotech would not be successful without our stakeholders as they are the ones who, whether directly or indirectly motivate us to pursue growth of the business and enable the development of new products. For instance, our consumers consider the company's impact on the environment and will be more motivated to purchase from us when we commit to sustainable practices. Our sustainable practices also show that we care about our employees' welfare and the environment. Thus, it guarantees our employees trust in the company and will attract future talented people to be recruited.

The development of sustainable business practices lends itself to efficient operations that streamlines effort and conserves resources thereby enhancing productivity and reducing cost. We realize that integrating sustainability into our operations positions our company to meet the country's evolving regulations in a timely manner. Overall, our sustainability practices will improve employee morale and productivity leading to an increase in sales and a decrease in our production costs. It's the ultimate win-win achievement for our stakeholders.

In driving sustainability within the organization, did you bring in sustainability experts or develop talent from within?

We did bring in a sustainability expert who then provided knowledge transfer in order to develop existing personnel within the company by grooming relevant individuals in the area of corporate sustainability. This is achieved via constant

stakeholder engagement especially during sustainability data monitoring and high-level trainings. The company's focus towards sustainability has led to the development and expansion of our sustainability department as we want to manage our sustainability data when it comes to all of our operation related processes at Duopharma Biotech Berhad including financial and non-financial. This major role is part of our sustainability blueprint in order to embark on the journey of sustainable development.

As a CEO who has clearly demonstrated the value of a top-down approach, what advice would you give other aspiring CEOs? How have you engaged at board level and within the organization to secure commitment?

My advice would be to advocate sustainability-related initiatives through a sustainability governance structure and a sustainable business model. This is integrated with risk management processes, therefore the top-down approach would be more feasible. In securing commitment, we constantly engage with the Sustainability team of Duopharma Biotech to discuss the required activities and planning. The outcome of those engagements made us recognize the importance of conducting sustainability training for the Board of Directors and our employees to have a better approach to achieve sustainable practices in the company. Moreover, we support and advocate sustainability initiatives for the betterment of our company in the future. For instance, we are committed to a solar project as a renewable energy source for our Bangi and Klang sites to reduce our carbon footprint. This is actually a direct result of our sustainability governance involvement.

What further regulatory guidance is needed in facilitating a conducive environment for corporate sustainability to flourish?

For corporate sustainability to flourish we had to take our sustainability efforts seriously. We continuously adhere to ISO standards of operations and acquiring certifications. In fact, we are working on acquiring ISO 37001 Anti Bribery certification as a group this year. We also comply to the Global Reporting Initiatives (GRI) standards of operations, including the GRI standard of governance by having the Board of Directors be the accountable party for the management of sustainability in the company. To this end the Board have set a Board Committee overseeing sustainability efforts. We think sustainability assurance would be a strong guidance for our sustainability data journey because this is done to verify our sustainability data without bias and will also strengthen our stakeholders' trust. A mandatory regulatory guide is needed to push for assurance which would certainly help the corporate sustainability climate in the country.

Tell us a little about your efforts in being included in the FTSE4Good Bursa Malaysia Index and advice to aspiring listed companies.

We placed serious efforts in achieving FGBM by governing our company in a different perspective instead of just by a regulatory perspective alone. This is done by constantly investing in sustainability initiatives such as investing in rainwater harvesting to reduce our water consumption. Data monitoring is equally important for us as we are a manufacturing company with great responsibility to provide quality services and products for our stakeholders. We implemented the sharing of sustainability knowledge to the entire company both locally and internationally by conducting sustainability training and issuing regular newsletters. Our company went a step further by becoming a participatory member of Global Compact Network Malaysia (GCMY), the local chapter of United Nations Global Compact (UNGC) to strengthen our sustainability journey and commitment. My advice to aspiring PLCs is to invest in sustainability related initiatives for the betterment of their company and this can be built via a strong partnership with UNGC as well.

In what way, if any, has the pandemic altered Duopharma Biotech's sustainability trajectory?

Duopharma Biotech has been proposed as one of the pharmaceutical companies in Malaysia to undertake the fill-and-finish processes for a Covid-19 vaccine, once it is available. We have a ready capacity to take on the fill-and-finish of human vaccines that could produce upward of six million vials per year. When we look into the speed and the investment, the development of a viable Covid-19 vaccine could be ready as early as next year. It is our responsibility as a pharmaceutical company to provide easy access to medicine for the people. Further, the pandemic pushed us to focus more on talent retention and learning development for our employees. We discovered that with the right training our employees are able to assume positions of higher responsibilities. As we move towards alignment with the UN Sustainable Development Goals we also recognize the important role of the United Nations Global Compact.

The pandemic pushed us to digitalize our operations in various aspects to minimize the risk of COVID-19 contact. For instance, we conduct online trainings and virtual meetings which reduces travelling for our employees, initiated conducting sales through the use of telephones (in house sales team) and our OTIF systems are fully operational despite the pandemic - enabling customers to continuously gain immediate access to medicines. This digitalization has certainly led to the reduction of our carbon footprint.

Alam Flora introduces Recycling Innovation Facilities (FIKS)

The Innovative Recycling Facility (FIKS) located in Presinct 5, Putrajaya is the only such facility that exists in the country, which provide a conducive learning centre and activities on recycling. Since its operations early this year, it is set to play a key role in encouraging Malaysians, especially Putrajaya residents, as well as nearby communities, to practice recycling in order to help reduce recycled waste to end up in the landfills. Among the facilities available at FIKS are, Knowledge Hub, 3R Boutique, Library, Buy Back Centre (BBC), children playground and also Integrated Recycling Facility (IRF). FIKS was officiated by the Minister of Federal Territories, YB Tan Sri TPr Annuar Hj Musa. Visitations are by appointment only and on first-come-first-serve basis every day except Sundays and Public Holidays, from 9.00 am to 4.00 pm. Those interested can book their appointment at fiks@alamflora.com.my.
